

GATEWAY
GROUP WA

Capability Statement

WA based, servicing
clients nationwide.

About Gateway Group

Western Australian business, locally operated.

Established in 2010, our business offers a more affordable and customised approach than original equipment manufacturers.

Gateway has quickly established itself as a reliable machinery parts supplier by supplying quality used and reconditioned parts to the industry.

Conveniently located in the industrial hub of High Wycombe, WA. With secondary facilities in Malaga for Hardchroming and Grinding.

Our purpose built workshops provides flexibility in services so customers can have an involved and specific approach to their machine and maintenance requirements.

2010

Gateway Equipment Parts & Services founded. Main operations established in Dalwallinu.

2012

Open our first office, located in Midland.

2014

Our main operations expand to 132 Sheffield Road, Welshpool.

2017

Purchase of Tomcat Hardchrome Engineering business.

2018

Our operations expand to 134 Sheffield Road, Welshpool.

2022

We move into our purpose built facility at 110 Nardine Close, High Wycombe.

2023

Milestone reached! 100 full time employees.

Our Capabilities

WA based, servicing clients nation-wide.

Gateway supplies equipment, parts, and services to Mining, Oil & Gas, and Civil Industries nationwide.

Our workshops have full machine rebuild, powertrain component remanufacturing, fabrication and engineering capabilities.

Full machine washdown, sandblast and spray painting facilities offering an end-to-end solution. Gateway specialises in hydraulic cylinders, hardchrome, cylindrical grinding and cylinder remanufacturing.

We provide Dry hire equipment focusing on Tyre handlers, Watercarts and Auxiliary fleet. Our vast range of experience provides businesses with measurable savings, quality, and support in the field you can rely on.

Our Facilities

Gateway's main facility in High Wycombe industrial area is approximately 15,000m², with secondary facility in Malaga for Hardchroming and Cylindrical Grinding.

- Mobile Plant workshop.
- Component rebuild workshop
- Fabrication and engineering workshop.
- Washdown Bay
- Sandblasting Bay
- Spray painting Bay
- Hydraulic cylinder workshop
- Large Parts warehouse
- 44,000L Hardchroming capacity
- Machining and Engineering workshop

Used Parts & Dismantled Machines

Gateway offers a wide selection of used and reconditioned parts from major manufacturers.

Gateway sources the majority of stock by purchasing complete used machinery, then these machines are dismantled to be sold outright as individual parts, either used or reconditioned.

Service Exchange

Gateway service exchange inventory includes a large range of hydraulic cylinders, powertrain components, and complete undercarriage.

Specialising in Caterpillar, Hitachi and Komatsu components to minimise downtime on your breakdowns and simplify your preventative maintenance through change out of complete components.

Mobile Machine Workshop

Gateway's state of the art mobile machine workshop is fully equipped and has capacity to take up to four large mining machines at once.

Whether it's a ready to work repair for a grader or 200 tonne class truck full rebuild we can do it.

Components Rebuild Centre

Our component rebuild centre can rebuild any major component from your mobile plant fleet.

Specialising in Caterpillar, Komatsu and Hitachi products but also experienced in other emerging machinery companies.

Hydraulic Cylinder Repairs

Our hydraulic cylinder workshop is extensively equipped to repair and remanufacture all hydraulic cylinders up to approximately 400T class excavators.

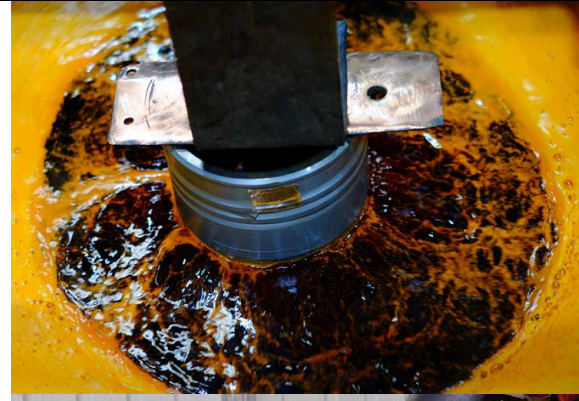

All operations of the repair conducted in house including but not limited to; machining, chroming, cylindrical grinding, honing and remanufacturing of rods and barrels, testing and assessing.

Hardchrome Plating

We have two Chrome Plating tanks varying in length and depth. Our plating solution chemistry is monitored constantly for maximum efficiency.

We can GCG up to 600mm diameter and maximum length of 4200mm.

Welding & Fabrication

Our welding services cater for a multitude of applications. Equipped with the latest technology we offer TIG, ARC & MIG welding for commercial and industrial needs.

Our inhouse engineer can provide additional value to your projects and requirements.

Machining & Engineering

With a large machine shop directly setup to support our hydraulic cylinder rebuilds

- Turning up to 1000mm diameter, up to 5000mm long.
- Milling up to 1500mm x 650mm.
- Horizontal borer with travel of 1800mm in the x axis capable of handling work pieces up to 6T.
- Line boring and welding mobile and onsite.

Equipment Hire & Onsite Services

Gateway's equipment hire can support your mining or civil projects with short and long term options.

Both dry hire and fully maintained fleet are available and backed up by our experienced team to ensure reliability at all times.

In addition to our equipment hire, Gateway offers deployable workshops, service vehicles and technicians for a complete onsite maintenance solution.

Sandblast and Painting

With state of the art facilities suitable for all sized mining machines and sub-components.

Gateway's sandblasting is ideal surface preparation for long lasting paint application with a full range of paint coatings to suit client specific needs.

People and Culture

Our people are the pillars for our success and the key to our growth. Together we've created a team of outstanding people who treat each other with respect and where we hold ourselves to the high standards that are aligned with the Gateway Group business.

Quite simply, our culture is built upon respect, inclusivity and teamwork.

Not only do we pride ourselves on being a safe and enjoyable business but also as an important member of the local (and greater) community. Taking part in and contributing to a number of worthy causes.

Safety

Every staff member, from management to apprentice, is responsible for safety, and feeling safe at work is a right of all employees.

Working in a professional and safe environment is Gateways number one goal.

All employees are highly trained in safety procedures relative to their role and the correct operation of plant equipment. Ensuring our high safety standards are consistently met and maintained.
